INDEX

References are to paragraph numbers throughout, so this index may be used with either printing of the Interim Report. Only those names which appear in the text of the report are listed in the index. The index does not include the references and footnotes for each chapter or the individuals and organizations listed in Appendix. A. The relation of one topic to another is shown by using the second as a subheading under the first; thus in most cases the subheadings also appear as index entries.
